

NCR CPKiosk is an in-store self-service platform that gives your customers a **simple and intuitive** path to accurately scan, pay for their purchases and bypass long lines.

Increase throughput and customer satisfaction with NCR CPKiosk

We live in a connected economy where customers' expectations and needs are constantly changing. Gone are the days of customers waiting in line to pay. Today's savvy retailer needs to increase throughput during peak times as well as **offer multiple ways for customers to pay.**

Increase sales

Managing peak times can be difficult. Adding kiosk stations into your operations can give you another channel for purchases and help you reduce the potential for walkouts.

Reduce your labor costs or shift workers to other areas of the business

Implementing an in-store self-service solution can reduce labor costs and increase throughput. This allows for cashier roles to be reallocated to more service-oriented roles to handle the volume and maximize customer satisfaction.

Enhance the guest experience

For customers that want to get in and out quickly, they can easily use an in-store self service station to purchase their items.

Provide your customers with convenience and flexibility

Millennials and digital natives are used to interacting with technology and prefer a self-ordering experience through both in-store kiosks and mobile and online sales.

Why NCR?

NCR is a leading technology company that brings unexpected value to every interaction between consumers and businesses. We're the **#1 global retail POS software provider** and **#1 global self-checkout provider**, we provide software, hardware and services that run the entire store.

Please contact your NCR Counterpoint partner for more information.

Digital first but not digital only, we help retailers differentiate and compete by connecting every touchpoint into the frictionless, "always on" experience consumers want today, while enabling tomorrow's innovations. From mobile to brick-and-mortar, from back office to loyalty and beyond, we help retailers bridge their digital and physical operations, transforming transactions into meaningful interactions—no matter where they happen.

NCR continually improves products as new technologies and components become available. NCR, therefore, reserves the right to change specifications without prior notice.

All features, functions and operations described herein may not be marketed by NCR in all parts of the world. Consult your NCR representative or NCR office for the latest information.
